

NEWS for Immediate Release

Visioneer Announces Availability of TWAIN® 2.1 Certified Drivers

Pleasanton, California – March 25, 2011 – Visioneer, Inc., a leader in intelligent document imaging solutions, today announced the availability of TWAIN 2.1 certified drivers for the current Visioneer® and Xerox® DocuMate® product lines. The new drivers are certified by the TWAIN Working Group (TWG) under their [recently announced certification program](#). According to the TWG, the TWAIN certification ensures that a company's data source responds correctly to commands sent by an application. As of this announcement, Visioneer has successfully certified and made available TWAIN 2.1 drivers for 11 Visioneer scanner models and 22 Xerox DocuMate scanner models.

“We applaud the TWAIN Working Group for creating a certification process to ensure that all drivers are held to the highest standard of compatibility. Our engineering team has worked hard to insure our drivers meet these standards across the product line,” said Jon Harju, senior vice president of engineering at Visioneer. “Visioneer is very committed to this program and our new TWAIN 2.1 drivers are just the beginning; we are already looking at implementing additional improvements that we believe will raise the bar on TWAIN driver performance.”

TWAIN certification signifies these TWAIN drivers are high quality and therefore should reduce the risk and cost involved with integration in enterprise environments.

- System Integrators are also able to have tighter integrations with these new TWAIN drivers since use of the user interface is now completely optional.
- Information Technology Managers can silently deploy and install device drivers to all employee computers without requiring user interaction or on-site support.

Availability

The new drivers are free and available immediately from the Visioneer support [website](#) and the Xerox DocuMate support [website](#). Additional information can also be found on the TWG [website](#).

About Visioneer

Visioneer provides a broad range of scanning solutions for the desktop, distributed and departmental document imaging markets as well as the mobile and remote business scanning segments. In 2003, Visioneer combined its leading scanner technology with the Xerox brand recognition to develop the Xerox® DocuMate® product line. Visioneer and Xerox DocuMate high-performance business scanners and imaging software solutions offer users speed, image quality, advanced paper handling and ease-of-use with exclusive Visioneer OneTouch® technology. For additional information on Visioneer and Xerox scanning solutions, visit www.visioneer.com or www.xeroxscanners.com.

About The TWAIN Working Group

The TWAIN Working Group's purpose is to provide and foster a universal public standard which links applications and image acquisition devices. Current members of the TWAIN Working Group include Adobe Systems, AnyDoc Software, Atalasoftware Inc., Avison Inc., Eastman Kodak Company, Fujitsu Computer Products of America Inc., JFL Peripheral Solutions, Hewlett Packard and Epson. More information about the TWAIN API and imaging standard can be obtained on The TWAIN Working Group's Web site at www.twain.org.

PRESS RELEASE: Visioneer Announces Availability of TWAIN® 2.1 Certified Drivers/2
