NEWS for Immediate Release

Visioneer Announces New DriverPLUS Technology

Visioneer DriverPLUS provides advanced features, greater reliability with a superior experience for both users and system integrators.

Pleasanton, California – November 7, 2011 – Visioneer, Inc., a leader in intelligent document imaging solutions, today announced Visioneer DriverPLUS, a new generation of driver technology for Visioneer and Xerox DocuMate scanners. Based on TWAIN 2.1 specifications, Visioneer DriverPLUS combines the features of advanced 32- and 64-bit native Windows®-based TWAIN and WIA drivers PLUS new Visioneer Acuity optimization software and a sophisticated user interface. Visioneer Acuity was also announced today in a separate release.

"We understand the importance of driver technology for the consumer and system integrator alike and have responded here. Visioneer DriverPLUS will provide users with the reliability and features they are expecting in their scanner driver backed by a powerful new GUI," said Jon Harju, Visioneer CTO and architect of DriverPLUS. "The PLUS means these new drivers are powerful, completely programmatic for the system integrator and optimized for Acuity. We feel we have raised the bar in scanner drivers and we are very excited to introduce our customers to this new experience in scanning technology."

Development of Visioneer DriverPLUS began months ago when the TWAIN Working Group (TWG) announced their certification program for scanner drivers. Visioneer committed to the program and made available TWAIN 2.1 Certified drivers for 11 Visioneer scanner models and 22 Xerox DocuMate scanner models on the day of the announcement. Visioneer immediately began looking to implement additional improvements to raise the bar on TWAIN driver performance through the development of DriverPLUS.

The features of Visioneer DriverPLUS include:
- New TWAIN driver
  - New and powerful GUI
  - 2.1 TWAIN programmatic interface
  - TWAIN 2.1 Windows 7 Certified Driver (32 and 64 bit native application support)
- New WIA driver
  - New and powerful GUI
  - Identical feature set to TWAIN
  - Industry's most robust WIA driver
- Silent deployment options for administrators
- Visioneer Acuity integration for TWAIN and WIA
- Windows 7 Device Stage integration
- Windows update deployment
- Web-based firmware updates
- Visioneer OneTouch 4.6.4 and above compatibility

Intelligent Imaging Solutions In Just One Touch

Availability

DriverPLUS will be part of new product releases in the Visioneer and Xerox DocuMate product lines going forward. The first products will be appearing this quarter. DriverPLUS will be available for currently shipping Visioneer and Xerox DocuMate scanners in a staged release that will continue throughout 2012. Users can download DriverPLUS from the Visioneer and Xerox Scanners website (system requirements verification required).

About Visioneer

Visioneer provides a broad range of scanning solutions for the desktop, distributed and departmental document imaging markets as well as the mobile and remote business scanning segments. In 2003, Visioneer combined its leading scanner technology with the Xerox brand recognition to develop the Xerox® DocuMate® product line. Visioneer and Xerox DocuMate high-performance business scanners and imaging software solutions offer users speed, image quality, advanced paper handling and ease-of-use with exclusive Visioneer OneTouch® technology. For additional information on Visioneer and Xerox scanning solutions, visit www.visioneer.com or www.xeroxscanners.com.
