

## For Immediate Release

### **New Visioneer Patriot H60 and H80 Scanners Help Businesses Make the Paperless Office a Reality**

PLEASANTON, Calif., April 10, 2017 – Digital transformation and the paperless office are priorities for businesses, but a recent report from AIIM found only 25 percent of respondents say they run a clear desk<sup>1</sup>. To help organizations take the first step to a paperless environment, Visioneer® today announced the Patriot™ H60 and H80, compact desktop scanners designed for scanning, storing, and organizing up to 10,000 double-sided pages daily.

“The Patriot H60 and H80 promise to boost workgroup productivity thanks to a range of features that aim to lessen user intervention,” said Jamie Bsales, director, Office Workflow Solutions Analysis at Buyers Lab (BLI). “Each scanner boasts a larger automatic document feeder (ADF) capacity and higher rated daily duty cycle than we typically see in this class of desktop scanner, as well as a best-of-breed software bundle including Nuance® PaperPort® for document management, OmniPage® for OCR tasks, and Power PDF for document conversion.”

Engineered to maximize productivity, the scanners accept up to 120 mixed sized documents – including old-fashioned dot matrix paper – into their document feeders and scans them at speeds of up to 140 images per minute for the H60 and 176 images per minute for the H80. The small footprint enables the scanners to sit comfortably on any desk, making it the perfect solution for both small and large businesses looking to digitize business-critical information.

“The first step to running a paperless office is making sure all data is digitized and stored correctly so employees can access the information at any time,” said Walt Thinfen, president and CEO at Visioneer. “The Patriot H60 and H80 are the ultimate point-and-click solutions that enable employees to digitize, store, and share documents and information with team members with the click of a button, leading to instant collaboration and improved productivity.”

#### **Benefits Beyond Scanning**

Businesses within the banking and accounting, education, energy, financial, government, legal, healthcare, and manufacturing industries can benefit from the scanners' features, including:

- **Visioneer Acuity with DriverPLUS TWAIN** uses advanced algorithms to intelligently and instantly correct and improve the visual clarity of scanned documents or images containing imperfections.
- **Visioneer OneTouch®** allows users to automatically route documents to email, printers, files on the server or to the cloud with one simple touch of a button.
- **“Light Jet” Technology** provides 45 times more light for improved image quality, resulting in sharper images.
- **Wide Automatic Document Feeder for “Full Bleed” Capture** when scanning color magazines full width or tractor feed paper forms with less manual preparation.
- **Nuance Power PDF** gives users the tools they need to create, convert, edit, assemble and securely share PDF files to increase office efficiency, enhance collaboration and improve compliance.
